

## Minimum length paths and their lengths – examples

Vlad Bogdan-Tudor, 1<sup>st</sup> Year, group 917, Computer Science

### graph1k.txt

The minimum length path between vertex 1 and vertex 100 is:

1 -> 5 -> 487 -> 175 -> 699 -> 624 -> 100, with a length of 6

### graph10k.txt

The minimum length path between vertex 1 and vertex 100 is:

1 -> 3300 -> 2607 -> 523 -> 6311 -> 5359 -> 9794 -> 5173 -> 100, with a length of 8

### graph100k.txt

The minimum length path between vertex 1 and vertex 100 is:

1 -> 17024 -> 27471 -> 14969 -> 3075 -> 4156 -> 32753 -> 14973 -> 100, with a length of 8
